

TRADING SIMULATOR (USER STORY)

Account Registration & Profile Management

- **As a new user**, I want to be able to create an account by providing my full name, address, phone number, city, zip code, and state. I will also set an initial virtual account balance, which will serve as my simulated trading funds, so that I can start participating in risk-free trading activities.
 - Acceptance Criteria:
 - User fills in personal details on the registration form.
 - User uploads a profile image.
 - User sets an initial account balance (e.g., \$50,000.00).
 - Account is created and user is redirected to the dashboard.
- **As a returning user**, I want to be able to log in using my previously created credentials, so that I can access my account and continue trading where I left off.
 - Acceptance Criteria:
 - User enters login details (username/email and password).
 - Upon successful login, user is directed to their personalized dashboard.

Dashboard & Market Snapshot

- **As an authenticated user**, I want to access my dashboard, which displays a summary of my account balance, trade log, and a real-time market snapshot featuring key indices (e.g., S&P 500), so that I can get a quick overview of my trading status and the market.
 - Acceptance Criteria:
 - Dashboard displays current account balance.
 - Dashboard shows a snapshot of the S&P 500 or other market indices with price changes.
 - Market updates are reflected in real-time or refreshed periodically.
- **As an authenticated user**, I want the dashboard to display my trade log, showing past trades with details such as stock symbol, trade type (buy/sell), quantity, price, and date, so that I can review my trading history and monitor my performance.
 - Acceptance Criteria:
 - Trade log shows all transactions with correct details.
 - User can filter or search the trade log for specific stocks or dates.

Trading Stocks

- **As an authenticated trader**, I want to be able to search for a stock by symbol (e.g., AAPL for Apple, TSLA for Tesla), view key information such as current price, opening price, daily high/low, and percentage change, so that I can make informed trading decisions.
 - Acceptance Criteria:
 - User enters a stock symbol and is presented with detailed stock information.
 - Stock details include price, exchange, change percentage, and daily high/low.
- **As an authenticated trader**, I want to buy or sell stocks by specifying the stock symbol, the number of shares, and confirming the transaction, so that I can practice making trades in a simulated environment without risking real money.
 - Acceptance Criteria:
 - User inputs stock symbol and number of shares.
 - System calculates the total value of the transaction.
 - Confirmation of the trade and update in the trade log and account balance.
- **As an authenticated user**, I want to be able to view my available balance and portfolio to understand how much virtual capital I have left and what stocks I currently hold.
 - Acceptance Criteria:
 - Account balance is updated after each trade.
 - Portfolio overview displays current holdings (stocks owned, quantity, value).

Market News Integration

- **As an authenticated trader**, I want to stay updated on relevant market news, such as significant stock movements or recalls (e.g., Tesla Cybertruck recall), so that I can make timely and informed trading decisions.
 - Acceptance Criteria:
 - News feed is integrated on the dashboard and shows relevant updates.
 - User can click to read full news articles.
 - News is updated periodically based on real-time events.

Search & Navigation

- **As an authenticated user**, I want to be able to search for stocks easily by entering a symbol or keyword, so that I can find the stocks I am interested in trading.
 - Acceptance Criteria:
 - Search bar is available on the dashboard.
 - Search results include relevant stock information and the option to trade.

User Settings & Profile Management

- **As an authenticated user**, I want to be able to edit my profile (e.g., change my personal details like name, address, or phone number), so that I can keep my account information up to date.
 - **Acceptance Criteria:**
 - User can update personal details in the settings.
 - Changes are saved and reflected across the account.

Logout Feature

- **As an authenticated user**, I want to be able to log out securely from the trading simulator, so that I can ensure my account information and trading data are protected when I am done using the platform.
 - **Acceptance Criteria:**
 - User clicks a "Logout" button located on the dashboard or main menu.
 - The system logs the user out, clears session data, and redirects to the login or welcome page.
 - User must re-enter credentials to log back in.
 -
